### Story of World-Travels

On Thursday evening a most interesting series of lantern slides was shown by Mr. R. H. Parker, world-wide traveller, who was visiting at the home of his sister-in-law, Mrs. Parker, of Lee Lake ranch home.

The slides, reproduced from photographs taken by Mr. Parker, included views of people and buildings in South Africa, India, China, Japan, Fiji Islands, United Kingdom and Canada.

During the South African war of 1899-1902 Mr. Parker served in the Royal Army Medical Corps, and during the world war he was engaged in Y.M.C.A. work.

His former visit to the district was in 1903, the year his brother Jack bought the farm at Lee Lake, and Mr. Parker humorously remarked that though he was invited to stay off for a few days, business called him to Winnipeg, and whilst there he received the news of the famous Frank rock-slide.

### J. C. Cox Makes Brief Visit on Travels

J. C. Cox returned on Tuesday of last week from an extended tour to the British West Indies, the Bahamas and the Panama Canal zone. He returned to New York, from where he proceeded to Walkerville, Ont. Here he purchased a swanky Studebaker 8-cylinder car and motored to Montreal. After a brief stay he proceeded to Quebec, whence he went to visit his mother in Wales, making the trip on the first eastward voyage of the "Empress of Britain." Whilst overseas he spent some time in London, attending a reception given by the high commissioner at Canada House, and he also visited Thos. B. H. H. and Sidney Halliwell, father and brother of the editor of The Journal. He next proceeded to Berlin, spending a few days there, subsequently returning to England. The return voyage was made on the "Empress of Britain," which is all that has been claimed, states Mr. Cox, and is the finest fitted ocean liner he has travelled on.

He left on Thursday last for Vancouver, and will remain there for some weeks. It is probable he will motor to Mexico and spend the winter there. During the year he has travelled about 25,000 miles.

### Announcements

Dr. A. E. Shore, of Drs. Gunn, Hackney & Shore, Calgary, will be at the office of Dr. R. E. Stewart, Blairmore, on the afternoon of Friday, August 28th.

Anyone wishing to consult him with regard to eye, ear, nose or throat, please make appointment with Dr. Stewart.

Your first stop on your way back to school is at F. M. Thompson & Co. Ltd., Blairmore, for new shoes and hose, a dress, suit, or sweater and school supplies.

Specials in scribbles, etc. Try our 9 for 25c package of fine quality exercise books. (Advt.)

### TOOK A HOLIDAY

Last week The Journal missed publication. "We" took a holiday. Advice is so often given that everyone needs a holiday that we decided to accept it. Many questions were asked why the paper was not in the mails or delivered by the boys, but no insignificant subscribers threatened to stop their paper when told we were taking a holiday. The issues missed will be credited on subscriber's card.

### CORRECTION

In a report of the funeral of Sam Strick in July 23rd issue of The Journal, it was incorrectly stated he was a Roumanian. He was a countryman of Yugo-Slavia. The Miners Union was not represented officially at the funeral, neither was the Catholic Sokol Society. The Polish Society of Coleman was officially represented.

The Journal has been requested to make this correction in the report.

The Misses Pearl and Jean McDonald, and Miss Naylor of Coleman, and Miss Harvey of Bellevue spent ten days camping at Lee Lake. On Saturday evening they entertained Mrs. Devine's party of girls who are spending ten days at the lake.

### A Monument to Capt Beebe

Captain Beebe, pioneer citizen of Blairmore, has been honored in appreciation of his many years of public service. The Blairmore Enterprise contains the following:

"It was claimed that in recognition of the efforts put forward by Capt. W. A. Beebe, a pioneer of the town and present member of the council and board of school trustees, towards securing a more substantial and permanent structure than that until recently being used, the new bridge, now in place, crossing at the Fifth Avenue crossing of the Old Man River be named the 'Beebe Bridge.' This motion was carried with considerable comment, some to the effect that Capt. Beebe was entitled to such a monument, not only for his services in this connection, but for the numerous good works accomplished by him since Blairmore came into being."

### Willing Helpers

Last week sections of trench 12 feet long, 2 feet wide and 7 feet deep were dug on Sixth street, in which is to be laid iron pipe to replace the wooden pipes of the water system. Contractor D'Appollonia, in charge of the work for the water company, has a system which ensures equal distribution of a day's work for a day's pay. He is a man who is not afraid of hard work, and he is not afraid of the heat. It matters not if he finishes at noon or at midnight, all receive the same or more. He is accustomed to laborious work, and he is not afraid of the heat. He is accustomed to laborious work, and he is not afraid of the heat. He is accustomed to laborious work, and he is not afraid of the heat.

By the time the trench is completed the length of the street, they will be as hard as nails and will have a closer knowledge of what constitutes real hard work, which, though it may not be as glamorous as some of the work that is done, it is no less necessary. The trench is completed, and the length of the street, they will be as hard as nails and will have a closer knowledge of what constitutes real hard work, which, though it may not be as glamorous as some of the work that is done, it is no less necessary.

Mr. and Mrs. Al. Lonsbury have returned to town from Vancouver, where they have been living for about two years.

"The group of boys known as the Explorers, who camped at Lee Lake for eight days on Friday, were delighted with their outing, and some wished for more."

Miss Helen Dutil of Blairmore exhibited oil and watercolor paintings at Pincher Creek exhibition, and was awarded first and second in water colors, first in oil painting and first in painting on chinaware.

Mrs. Borden and family, and Mr. and Mrs. Bowling have been spending the past week at Lee Lake; Wilfred Hoyle was the guest of Bob Borden. These boys have been trying to qualify as master mariners by fitting up a punt with a mainsail and top sparker. For the first few days their problem was to raise sufficient wind to fill the sail.

### Burlington Tours Visit Blairmore

Approximately 200 visitors from many states of the Union have stopped over at Greenhill hotel, Blairmore, during July and August. They have been booked by Burlington Tours, which this year for the first time included the Crow's Nest Pass in its travels. Manager (Mrs.) of the Greenhill states the visitors were delighted with the district, and the scenic attractions of this route were most favorably commented on.

Save 7 per cent. by paying your school taxes before August 28th.

Mr. and Mrs. George Pattinson are on a motor trip to Spokane.

Blairmore and Coleman will play a baseball game at 6 p.m. this evening at the ball park, admission by tag 25c.

Each year Griffiths entertained a number of young people at her home on Friday evening, in honor of Myrtle Nelson.

Coleman Cash Grocery was awarded a prize in the window dressing contest for Lux Soap, conducted by Lever Bros., manufacturers.

A party of girl friends met at Mrs. Nielsen's on Tuesday evening to bid farewell to Marie and Virginia Olson, who with their parents have lived here for several years. Mr. Olson is section foreman for the C.P.R., and is moving to Missoula. They made many friends during their residence in Coleman.

After selling a quantity of oldclothes around town, a party of people from Ontario, with four cars, men, women, children and dogs, who had camped at the tourist camp for four days, finished up with a fight, and the camping ground was left with paper, old pots and tin cans as a souvenir of their visit.

### YOUR BUSINESS

It is the best in the world, even in this time of depression. Don't be too modest about your business and its value to your community—advertise it at every opportunity.

Cures For Depression

Among the thousand and one articles, speeches and interviews to which the people have been treated on the all-pervading subject of the existing economic and financial depression, there has at last appeared one courageous individual who presents the rather unpopular doctrine that continued depression might be a good thing for the country.

The man advancing this opinion is George Richardson, newly-elected president of the National (United States) Association of Purchasing Agents, which organization, it is stated, represents the material buying power of the big republic to the south. Mr. Richardson takes a sharp rap at the professional optimist and the nostrum specialist in a special message to the members of his organization in the course of which he says:

"We are now in the second year of a corrective period, which in the judgment of many of us is a wholesome and much needed reminder that there are basic economic, as well as moral, laws which do not change with the seasons, and are not affected by mob psychology; and, when flagrant disregard for these laws attains the proportions witnessed prior to the close of 1929, the measure of retribution which is meted out to us is in proportion to the extent of their breach." Then follows his declaration that "it might be very beneficial in establishing a sound foundation for permanent recovery to have this period of fast and abstinence continue for awhile. There is no substitute for intelligence, hard work and close application to business."

Mr. Richardson, who thinks constantly in terms of buying rather than selling, finds that "business men need to have it borne in on them that they cannot get and hold something for nothing," and that "a return to hard work and a less extravagant living" are the only possible antidotes to "existing unsound tendencies which are manifest on every hand."

Contrasted with this statement of hard work and less extravagant living, which latter means less spending, is the view expressed by a writer in a well known Canadian financial paper. He says: "It has been stated that the solution of the present depression is hard work, economy and thrift. This has a nice sound but, unfortunately, the people who advance it do not clearly appreciate what the true effect of their recommendation would be. Hard work means producing and putting on sale a large quantity of commodities as we did in 1928. Economy and thrift mean spending as little as we can of our annual income and saving the rest. Doubtless by strict economy we could live on three billion dollars and save one billion of the four billion production in 1928. But if a four billion dollar production is put on sale and we offer only three billions for it, prices must be lowered and the producers accept a loss of one billion dollars. Then as only three billions were received, the producers will be forced to reduce wages and the opportunities for employment it can offer in the future by one billion dollars. Thus economy and thrift create the conditions that precipitate a depression."

Now, in our humble opinion, there is something to be said for both these points of view. Hard work we consider essential in this world. Extravagance should be curbed, and by extravagance we mean expenditures on non-essentials, or even on essentials beyond the ability of the buyer to pay for, and consequent running into debt. Thrift, not miserly hoarding, is wise and necessary, but it should not be carried to the extreme of denying one-self necessities, reasonable pleasures, and on what may be termed luxuries. Protection against old age, possible sickness, and an ultimate loss of earning capacity; in a word, assurance of a future competence is all that is required.

The trouble is, and prior to the close of 1929 it became widespread, that thousands of people do aim to get and hold something for nothing. It simply cannot be done. We must pay for what we get. Speculation ran riot; hundreds of thousands of people bought on the installment plan beyond their ability to pay. The inevitable crash followed, and the depression was upon us.

There is a happy medium between the extremes of spending one hundred cents of every dollar earned, even going into debt beyond one's ability to pay, and miserly living in fear of the future and hoarding every possible dollar. That happy medium is to be found in (1) living within one's income; (2) small but regular savings, and these not merely hoarded but wisely invested in order that they may be available to expand industry, create employment, in a word, perform their proper function in the world; (3) expend one's expenditures in keeping with proper increase of income. In other words, every one's dollars should be kept busy.

To illustrate: Industry (and we include agriculture) produces. It pays for raw materials, wages, transportation, distribution, etc. The wage-earners, in turn, buy the goods and foodstuffs thus produced. Thus the money paid out in wages returns to industry, to again be paid out in wages, to again return to industry. The more frequently a dollar is thus turned over, the greater the production, the larger the total of wages paid, the greater the business turnover of the nation; hence the greater the prosperity, and the absence of a depression.

This, we believe, is sound economics and good finance. It is, however, necessary to add that while the above observations apply to industry generally, including agriculture, there are seasonal conditions, such as the present widespread crop failure, which cannot be overcome even by the hardest of hard work, the strictest economy and thrift. These exceptional conditions must be met by exceptional remedies. They are, however, exceptions which do not nullify the truth and strength of the general policy to which expression has been given.

More than 3,000 miles of new airways will be lighted this year in the United States.

Happiness often depends upon what we do with our spare time.

## HEADACHE?

Why suffer when relief is prompt and harmless?

Millions of people have learned to depend on Aspirin tablets to relieve a sudden headache. They know it eases the pain so quickly, and that it is so harmless. Genuine Aspirin tablets never harm the heart. Read directions in package for headache, neuralgia, summer colds, pain of all kinds.

**ASPIRIN**

**How To Read A Book**  
Lord Macaulay said: "When a boy, I began to read very earnestly, but at the foot of every page I read I stopped and obliged myself to give an account of what I had read on that page. At first I had to read it three or four times before I got my mind firmly fixed. But I compelled myself to comply with the plan, until now after I have read a book through once, I can almost recite it from the beginning to the end."

**Oldest Ship Afloat**  
Believed to be the oldest ship afloat, the "Success," the sole survivor of the old-time convict fleet which sailed between England and Australia, has been kept in her original state and is now sailing around the world as a "side show."

Playing with Braille cards against players with normal sight, F. Manley, of London, who was blinded in the Great War, won first prize at a whist drive at St. Pancras, London.

One-piece bathing suits are practically taboo in Argentina.

## Awards For the Blind

Gold, Bronze and Silver Medals and Cash Awards For Sightless Achievements of the blind in Canada and the United States were recognized by the Harmon Foundation in the granting of 109 awards to sightless men, women and children. Gold, bronze and silver medals, and cash awards of \$2,500, were given to individuals who had disregarded the handicaps of blindness in their efforts toward accomplishment.

Canadian recipients are: Dr. A. T. Baynard, Edmonton, \$50 and bronze medal for achievement of economic value; Joseph Clunk, Toronto, \$50 and gold medal for accomplishment or progress in first two years of blindness.

Edgar J. Miller, Swift Current, Sask., \$20 and bronze medal for participation in home activities; Adolphe Renault, Montmagny, P.Q., \$10 for achievement of economic value; M. C. Robinson, Victoria, B.C., \$10 for achievement of economic value, \$20 and bronze medal for accomplishment of progress in first two years of blindness, and \$20 for participation in home activities.

For improvement of children in schools for the blind, the following schools were represented, each pupil receiving \$5 and a bronze medal: Ontario School for the Blind, Brantford, Ontario; School for the Blind, Point Grey, B.C.

## Cruise Was Successful

Dr. Eckener Satisfied With Zeppelin Trip To Arctic

Home from the top of the world after a week's cruise, the Graf Zeppelin landed at Friedrichshafen, Germany, amid lusty cheers of thousands who flocked to the airfield instead of going to work.

"It was a splendid and highly successful cruise," Dr. Eckener said. "Some people may have thought we were out in a dreadful region of ice and extreme cold, but from the very beginning we never doubted for a moment that this would be a relatively easy trip. Often we enjoyed skies of Italian blue and we never were bothered by the discomforts of the Arctic."

"Many people thought we did not accomplish all we set out to do, but perhaps we did not mean to do all that some papers said we intended. I hope this cruise will have a two-fold result, namely, that we may soon make another journey to the Arctic when we can get the necessary funds together, and that the Graf Zeppelin will become a favourite with tourists who feel the call of the north."

## Long Journey On Skis

Major Scotts Crossed 500 Miles Of Arctic Ice

Major James M. Scott, member of the British Aero-Arctic expedition to Greenland, arrived at Igloovik July 20 after having crossed the inland ice on skis from Lemon Rose camp, Angmagssalik, Ford.

The British Expedition to Greenland, which has been there a year, is obtaining data for use in mapping an air route from England to Canada.

Major Scott left Lemon Rose camp July 1 on the journey across the ice to Igloovik, a distance of almost 500 miles.

Persian Balm the creator and preserver of beautiful complexions. Tonic in effect and wonderfully stimulating. Safeguards and beautifies the most delicately-textured skins. Cools and relieves all skins flushed or irritated by weather conditions. Magical in results. A little gentle rubbing and a youthful freshness and delicacy is instantly created. Invaluable for softening the hands and making them chastely white. Truly the perfect toilet requisite for the woman who cares.

## An Automobile Chapel

The motorized church made its appearance in New York when a small white chapel, built over the chassis of an automobile, eased into Wall Street, and a clergyman preached from the rear platform on the theme of "Depression." The automobile chapel belongs to the Evangelistic Committee of New York, which during the last eight years has used automobiles in its campaign.

About the only difference between the old time novel and one of today is \$1.90.

Don't suffer any longer from these unsightly blemishes. Overcome them at home! Get 3 oz. Perfection Powder from your drugist! Sprinkle a little on face cloth, apply with a circular motion and the blackheads will be all WASHED AWAY. Satisfaction or money returned.

## UNIVERSITY OF MANITOBA

**WINNIPEG**  
Offers, among others, the following Courses:  
Through its FACULTY OF ARTS AND SCIENCE, courses leading to the degrees of B.A. and M.A., and B.Sc. through its FACULTY OF EDUCATION, courses leading to the degrees of B.Ed. and M.Ed., and through its FACULTY OF MEDICINE, courses leading to the degree of M.D. through its FACULTY OF DENTISTRY, courses leading to the degree of D.D.S. through its FACULTY OF AGRICULTURE, courses leading to the degree of B.Sc. and through its FACULTY OF ENGINEERING, courses leading to the degree of B.Sc. and through its FACULTY OF LAW, courses leading to the degree of LL.B. For terms of admission, details of courses and other information, apply to W. J. SPENCE, Registrar, University of Manitoba, Winnipeg.

## Does Away With Guesswork

New Device Is X-Ray and Radium Meter

The "X-Ray Yardstick," a device to make use of X-rays and radium safer, was adopted by the Third International Congress on Radiology at Paris last year. The device is a portable machine which measures the "dosage" of X-rays accurately. It is an X-ray and radium meter. Its adoption means that for the first time there is a standard unit of use in all countries in measuring short-wave radiation.

The importance of this agreement lies in the destructive powers of X-ray and radium, an overdose being as bad as too little, and occasionally even fatal. The difficulty with X-rays has been more than with radium because the intensity of radiation varies greatly with differences in the numerous varieties of X-ray tubes.

There has been necessarily much guesswork, and also sometimes confusion among radiologists in one nation about applying the progress of their fellow workers in another part of the world.

The meter was developed by Dr. Lauriston H. Taylor, of the United States Bureau of Standards.

## Recipes For This Week

(By Betty Barclay)

### GINGER PEARS

5 pounds hard pears.  
5 pounds sugar.  
½ cup preserved ginger cut in small pieces.  
3 lemons, juice and grated rind.  
3 cups water.  
Remove the skin and cores from the pears and cut the fruit in slices lengthwise. Add the water and cook the pears until they are tender. Add the sugar and the other ingredients and cook the mixture until it is thick. Pour it into clean, hot jars and seal. Hard varieties of apples may be preserved in the same manner.

### HUCKLEBERRY SURPRISE

1 junket tablet.  
1 tablespoon cold water.  
1 pint milk.  
3 tablespoons sugar.  
½ teaspoon vanilla.  
Fresh huckleberries.  
Sort and wash fresh huckleberries. Put a heaping tablespoon in the bottom of five dessert glasses. Prepare junket according to directions on the package. Pour at once over the huckleberries. The berries will come at once to the top and make a very tempting dish. Let stand undisturbed in a warm room until firm—about 10 minutes. Then chill.

### Time Is Extended

Canadian cattle destined to British markets may be carried on open decks until November 1, Hon. Robert Weir, Minister of Agriculture, has announced. The extension of one month from the usual closing date of October 1 was made possible through representations conveyed to the British authorities by Hon. G. Howard Ferguson, Canadian High Commissioner.

Miller's Worm Powders, being in demand everywhere, can be got at any chemist's or drug shop, at very small cost. They are a reliable remedy for worm troubles and can be truly relied upon to expel worms from the system and abate the suffering that worms cause. There are many mothers that rejoice that they found available so effective a remedy for the relief of their children.

### Wealth In Aikali Lakes

The alkali lakes in the Prairie Provinces are an important source of new mineral wealth. Production in these lakes last year was \$7,571 tons, an increase of 800 per cent. over the output in 1929.

Homing pigeons were used by the Roman army to carry messages in wartime at least as far back as 43 B.C.

Air parcel post service has been established between London, England, and Karachi, India.

## France To See Indians

Parisian Artist Will Select Group From Canadian Tribe  
For the purpose of collecting a group of Canadian Indians to take to France, Paul Coze, Parisian artist and Boy Scout Commissioner, who last year headed an expedition into the north to study the Redskins in their native haunts, has arrived once more in Canada. Accompanied by Madame Coze and by Pierre H. Godard, a Canadian now living in France, he left Montreal for Dehden, Sask.

From there the trio travelled by airplane to the Mission of Ile a la Crose in Northern Saskatchewan. In addition to selecting 15 Indians who will demonstrate their nomad life for the Parisians next winter under the auspices of the Trocadero Museum of Ethnography, Mr. Coze has another object in coming to Canada this summer.

As a mark of thanks to the Oblates of Ile a la Crose for their kindness to the French travellers last year, he will present a portable altar to the Mission.

## Fooling Jack Frost

Ethylene Gas Hastens Ripening Of Fruit At Morden, Manitoba

The farmer doesn't very often get a chance to fool Jack Frost, especially on a soft crop like tomatoes, but experimental work at Morden, Man., by the Dominion Department of Agriculture shows conclusively that this can be done. With the advance of the season tomatoes ripen more slowly and the use of ethylene gas speeds up the process from late August on. Fruit in danger of frost damage can be picked and quickly ripened by the use of this gas.

**Asthma Overcome.** The triumph over asthma has assuredly come. Dr. J. Kellogg's Asthma Remedy has proved the most positive blessing the victim of asthmatic attacks has ever known. Letters received from thousands who have tried it form a testimonial which leaves no room for doubt that here is a real remedy. Get it today from your dealer.

## Alberta Aviator Chosen

To Operate Air Mail Service For Government Of Siam

Reginald B. Jackson, 31-year-old Edmonton airman, is to operate the air-mail services of the government of Siam. Well known among northern fliers, Mr. R. Jackson is enroute to Bangkok, where he will make his headquarters as operating manager of the Siamese service, under a three-year contract.

From the Old Country, Mr. Jackson came to Alberta as a child. After living for some time in Calgary he obtained his license as a commercial pilot, and later aided in forming Great Western Airways, Calgary. He was one of the founders of the Calgary Aero Club and was secretary of Commercial Airways, Limited, from last fall until suspension of services this spring.

A man would have no pleasure in discovering all the beauties of the universe, even in heaven itself, unless he had a partner to whom he might communicate his joy.

## HER HUSBAND TEASED HER

But not for long!

"I started taking Kruschen Salts for biliousness, and for the last two years I have been perfectly free from an attack. Now I continue to take them, as I find they keep me in perfect health. My husband used to joke about me taking Kruschen Salts; now he takes them himself, so do my children. My sincere thanks."

—Mrs. G. P. P.  
When your gastric or digestive organs refuse to flow, your food, instead of becoming absorbed into your system, simply collects and ferments inside you, producing harmful acids and gases which give rise to biliousness, heartburn and flatulence.

Kruschen is a combination of six mineral salts, which goes right to the root of the trouble. It first stimulates the flow of gastric and other juices to aid digestion, and then ensures complete, regular and uniform digestion of waste matter every day. And that means a blessed end to biliousness, and a renewed and whole-hearted enjoyment of your food without the slightest fear of having to pay the old painful penalty.

## Why Helium Is Safe

Valuable Because It Will Not Burn Or Explode

The tremendous value of helium gas for dirigibles is emphasized anew by the accident which destroyed the Goodyear-Zeppelin airship "Mayflower" at Kansas City the other day.

Driven by a high wind, the "Mayflower" ran into high tension wires, took fire and burned. The four men aboard were injured, but escaped alive.

The "Mayflower" was filled with helium and the four undoubtedly owe their lives to that fact. For if a ship filled with explosive hydrogen had run into high tension wires and caught fire, every man aboard would have been burned to a crisp. Helium, which neither burns nor explodes, kept a bad accident from becoming a terrible tragedy.

The children of today may be better educated than the children of yesterday; but the children of yesterday had one thing on the children of today; they were taught to say "Thank you" and said it.

**Eagle Brand Milk**

## Exchange Of Views Results In Accord For Italy And Germany

Rome.—Chancellor Heinrich Brüning and Foreign Minister Julius Curtius of Germany, left Rome Saturday night to return to Berlin after two days of conversation with Premier Mussolini and they carried with them the promise of Mussolini to pay a return visit to Berlin at a date still to be determined.

Both the Duce and the German Chancellor agreed before they parted that they had established the basis for a closer friendship between their countries, a friendship from which the world might expect to profit.

When the Duce visits Berlin it will be the first time in his career as a world figure that he has left Italy to pay an official visit to another government.

Some tangible results of the Rome conversations were announced Sunday, but vastly more important, it was said, was the exchange of views that showed general agreement on many subjects, such as aspects of the disarmament question, reparations, the European political situation and others.

In all the conversations, it was learned, Mussolini was as emphatically in favour of heavy strengthening of armaments as he has been in recent public statements. He held, it was said, to the thesis that Italy must have the right to the same armament as any of her European neighbours, but that she does not care what methods are adopted so long as they are fair and effective.

It was learned that Mussolini's conviction that the reparations are too great a burden was discussed from the view that the problem affects the entire world.

## Woman Flyer Breaks Record

Any Johnson Makes Fast Trip London To Tokyo

Tokyo, Japan.—Any Johnson, British woman flyer, landed at Techikawa aerodrome at the conclusion of a flight by easy stages from England. She was accompanied by C. S. Humphries.

The British aviatrix, the first woman to fly from London to Tokyo via Siberia, completed the flight in ten and a half days and beat by a few hours the 11-day light plane record between the two cities, made by Seiji Yoshikawa, Japanese aviator. Miss Johnson's last hop was made from Seoul, Korea.

Japanese and British officials greeted her and Humphries, her mechanic, a few minutes after her arrival. The United States flyers, Hugh Hermon, Jr., and Clyde Pangborn, congratulated them at the airfield.

## Proposed Immigration Of Doukhobors Will Be Strongly Opposed

Winnipeg, Man.—While the four western provinces and the Dominion Department of Immigration unanimously posted up "no-more-Doukhobor" immigration signs, Peter Verigin, leader of the religious sect in Canada, reiterated his intention of bringing between 20,000 and 30,000 Doukhobors from Europe to Canada in the near future and settling them on farm lands in western communities.

Migration movement plans would be carried forward, Verigin said, despite protests of the governments. The thousands of newcomers would be brought to Canada and, if the Dominion turned them away, they would be taken to "some other" country.

"Besides," added the chief of all Doukhobors in Canada, "the communities of Doukhobors now in this country also will be moved to another country."

Verigin said the immigrants would be able to meet financial regulations set up by the Canadian Department of Immigration. The majority would come from Russia and Germany. He made no comment on the mention, by Ottawa officials, that under Soviet regulations the Doukhobors could not bring any amount of capital out of Russia, and so could not qualify for entry.

"The Doukhobor immigrants whom I propose to bring to Canada will be able to satisfy departmental regulations in respect to money possessions, land for settlement, etc.," Verigin said. "I have already purchased and paid for with cash, land for them to

## Preparing Relief Plans

Government Will Be Making Definite Announcement Shortly

Ottawa, Ont.—Highway construction will be concentrated upon throughout Canada as a means of taking care of single unemployed men. This intimation was given by Hon. G. D. Robertson, Minister of Labour in discussing the program of the government respecting unemployed relief. Preliminary conferences have already taken place with several of the provincial governments, Senator R. A. Gordon said, and within the next week or so a definite announcement may be expected as to the working out of the plan.

"The general view of the municipalities," he stated, "appears to be that they will be willing to redouble their efforts to find employment for married men providing the provinces and the Dominion provide work outside the cities for single men, particularly transients. Although the government's final decision has not been made, the probability is that highway construction will be carried on extensively to take care of men without family ties."

Until all the provinces have an opportunity to present their views, the Minister said, details on the plan, such as the amount provided for each province, nature of the construction camp to be set up and rates of wages to be paid, could not be indicated.

## Nautilus Proceeds Northward

Experts, However, Believe There Is Little Possibility Of Reaching Pole This Year

Bergen, Norway.—The Arctic submarine "Nautilus" left for Tromsø, Norway en route to Spitzbergen, but one member of the crew, and disheartened, remained behind.

Sir Hubert Wilkins' American cook was replaced by a Norwegian. The cook disconsolately told interviewers that he had been dropped because he was getting so fat it would be difficult for him to escape over the ice in case of emergency.

Polar experts here said there was made the possibility of Wilkins reaching the pole this year.

Thinks Soviet Plan Will Fail

Toronto, Ont.—The five-year plan of Soviet Russia is doomed to failure, according to Hon. G. Howard Ferguson, Canadian High Commissioner in London, England, and former Conservative Premier of Ontario. In an interview here, he asserted his belief that the collapse of the plan was inevitable.

## Immigration Falls Off

Greatest Decrease Shown In Arrivals From Other Than Britain and U.S. Ports

Ottawa, Ont.—Immigration to Canada during June showed a decrease of 76 per cent. compared with June a year ago, the figures being 3,169 and 13,171, respectively. According to a statement issued by Hon. Wesley A. Gordon, Minister of Immigration and Colonization, the total immigration to Canada in the three months, April 1 to June 30, 1931, has been 10,188, compared with 46,890 in the same three months a year ago.

The greatest decrease is shown in immigration other than that from the British Isles and the United States. The present small movement from continental Europe consists almost wholly of wives and minor children of Europeans already permanently settled in Canada.

Total immigration for the first three months of the present fiscal year, compared with the corresponding period a year ago consisted of British 3,816 compared with 16,587; United States, 4,807, compared with 9,510; other countries 1,555, compared with 23,791.

## Indians Treated For Infantile Paralysis

Outbreak Of Disease At Fort George Has Been Checked

North Bay, Ont.—The outbreak of infantile paralysis among Indians at Fort George is well under control, according to word brought back from the settlement by Pilot Byrnes of the Royal Canadian air force. Byrnes landed his plane on Trout Lake near here after flying to the Indian Colony with a quantity of infantile paralysis serum.

Fort George is about 150 miles north of Moose Factory on the east shore of James Bay. The serum was rushed from Ottawa by aeroplane when word of the outbreak was received by the department of Indian Affairs. Byrnes flew to Moose Factory, picked up a physician, and then continued to Fort George.

The serum was administered immediately and it was expected by the doctor that danger of the malady spreading had been removed. Pilot Byrnes flew back to Ottawa.

## Epidemic Under Control

Spread Of Anthrax In Eastern Manitoba Believed To Be Checked

Winnipeg, Man.—Dr. Alfred Savage, Chief Animal Pathologist for Manitoba, announced that the anthrax epidemic among horses in eastern Manitoba was under control and was confident the disease would not spread. Sixteen horses used in highway construction between Repulse, Man., and Ingolet, Ont., died during the brief epidemic which was checked when serum was rushed to the area.

Both Dominion and Provincial government veterinarians and sanitary and contagious diseases officials were camped in the Rennie district, though danger of the epidemic spreading was believed to be averted. The district was still closed to the public.

## LIVE STOCK HEAD

G. B. Rothwell of Ottawa, who has been appointed Dominion Live Stock Commissioner to succeed H. Arkell, who resigned some months ago.

## Winnipeg Bank Robbery

Manager Fires Five Shots, But Bandits Escape With Cash

Winnipeg, Man.—In a quiet residential district of Winnipeg bank bandits injected great excitement as they held up a branch of the Royal Bank of Canada, escaping with \$1,000. The robbery occurred at the corner of Mountain Avenue and McGregor Street, in the north end of the city, the robbers gaining their freedom in a speeding automobile followed by five shots aimed at them by the manager of the bank.

Entering the establishment five minutes before closing time, the bandits forced the manager, E. L. Mundy, and teller, A. V. Monnin, into a back room.

One of the bandits thrust the cash into his pocket, then, with his companion, dashed for the door and into a waiting auto. As the holdup artists fled the car, Manager Mundy grabbed his revolver from his desk and fired five shots at them, but none apparently struck their mark. A driver of a truck passing at the time, noticed the fleeing pair and gave chase, but the robbers gained the slow truck.

Winnipeg, Man.—Two men were held by Winnipeg police in connection with the hold-up. Arrested at Winnipeg Beach, 50 miles from here, the men gave their names as Stanley Scales and John Chouinard. Both the men are about 20 years of age and were taken into custody along with another man and three girls at the Beach hotel.

## Do Not Favour Move

Closing Of Turner Valley Wells Opposed By Operators

Calgary, Alberta.—Fears for life and property were expressed by independent operators when government officials commenced closing in Turner Valley wells preparatory to taking pressure and production tests.

A. G. Spooner, pioneer operator, declared frankly that unless the Government officials were prepared to sign documents assuming full responsibility for damages, he would not permit them on his leases.

## Initial Pool Payment Of 35 Cents A Bushel On A Voluntary Basis

Ottawa, Ont.—An initial payment of 35 cents a bushel, for Fort William, to those wheat growers who enter a voluntary pool, the operation of the 1,600-odd country and terminal elevators owned by the three prairie wheat pools as "private" concerns, government action looking towards the orderly marketing of the 1931 crop, and a definite assurance that "panic conditions" will not be permitted to control prices this year, constitute the outstanding features of a statement issued by the Prime Minister.

Mr. Bennett's declaration followed the conference which have been in progress between the government and representatives from western Canada. Hon. J. E. Brownlee, Premier of Alberta; Hon. Howard McConnell, Provincial Treasurer of Saskatchewan, and John I. McFarland, general manager of the pool's central selling agency, Winnipeg, were the delegates with whom the Prime Minister and his colleagues thrashed out the arrangements for the marketing of the crop.

Significant in the Prime Minister's statement is that the elevators will have "ample working capital" and that the prairie provinces will not be required to guarantee the elevator operations.

From Mr. Bennett's statement follows: "The wheat pools of the three western provinces, which own nearly 1,600 country elevators, as well as terminals at Vancouver and Fort William, will operate this year in the same way as private owned enterprises. They will have ample working capital, and the provinces will not be called upon to guarantee their operations."

"As a substantial number of producers desire to market their grain on the pool principle, the elevators operated by the pools in the several provinces came to Ottawa for a grain deal with the operation of a voluntary pool. The elevators will make to such producers an initial payment of 35 cents per bushel on the same basis as to quality and point of delivery as in previous years."

"The Dominion Government will take whatever action may be necessary to insure the orderly marketing of the crop of the year. Panic conditions will not be permitted to control the price obtained for this year's western grain crop."

Ottawa, Ont.—The five-cent bonus on wheat is separate altogether from the 35-cent initial payment on pooled wheat," declared Hon. Robert Weir, Minister of Agriculture, confusion existing in western Canada due to the belief entertained in some quarters that the five-cent bonus was included in the 35 cents.

"That confusion arises out of the fact that before the western representatives came to Ottawa the pools had undertaken an initial payment of 30 cents a bushel. The announcement today that this initial payment would be raised to 35 cents has no doubt created the misapprehension that the additional five cents is the bonus money. That is not the case; it is merely an increase in the initial payment of 30 to 35 cents," the Minister said.

## Lad Shoots Officer

Ten-Year-Old Boy, Caught In Robbery, Shoots Sheriff

Las Vegas, Wash.—Sheriff John Worrell, 72, was shot and killed by a 10-year-old boy, who said he had been promised \$2 and a trip to Canada for the robbery.

The boy, Hubert Nichols, Jr., was found robbing the Klaus Mercantile store, and was arrested by the sheriff, Deputy Wayne Ezema, and Peter Klaus, owner of the store.

While the sheriff was searching the store, the deputy said, the boy, hidden behind a vinegar barrel, fired at him from a distance of five feet. The bullet pierced the officer's brain.

Young Nichols threw away his pistol and surrendered without resistance.

## Fewer Going To States

Washington, D.C.—The state department has announced a decrease of 11.3 per cent. in Canadian immigration into the United States during the fiscal year ended June 30. A total of 14,778 visas were issued to Canadians in that period as compared with 1,984 during the previous fiscal year.

## Prince Edward Island Elections Result In Conservative Victory

Charlottetown, P.E.I.—Conservative gains of 13 seats in the general election elected, apart from the premier, Hon. J. P. McIntyre, Minister of Public Works who was returned by a majority of 26 votes. Hon. Thane Campbell, former attorney-general, defeated in a by-election last year, was successful.

Hon. J. D. Stewart returns to the premiership of Prince Edward Island after an interval of four years. His government went down to defeat in the general election of June, 1927, when he had appealed to the country on a policy of government control of the sale of liquor. Prohibition was not an issue in the recent contest. Mr. Stewart having announced that he would endorse the present prohibitory law.

Mr. Stewart returns with four of his former colleagues in the government. Hon. Frank MacPhee, formerly Minister of Public Works, and Hon. A. F. Arsenault, L. L. Jenkins, and Dr. J. D. MacMillan, formerly all without portfolio. He had appealed to the electorate on alleged extravagance of the Lea Government in the matter of highway construction and promised improvement in technical and agricultural education along with his best efforts towards the full implementation of the Duncan report.

They were: Hon. B. W. Lepage, Peter Sinclair, Russell Clark, Dr. J. F. MacNeil, and Horace Wright, all members without portfolio. The

ing capital, and the provinces will not be called upon to guarantee their operations."

"As a substantial number of producers desire to market their grain on the pool principle, the elevators operated by the pools in the several provinces came to Ottawa for a grain deal with the operation of a voluntary pool. The elevators will make to such producers an initial payment of 35 cents per bushel on the same basis as to quality and point of delivery as in previous years."

"The Dominion Government will take whatever action may be necessary to insure the orderly marketing of the crop of the year. Panic conditions will not be permitted to control the price obtained for this year's western grain crop."

Ottawa, Ont.—The five-cent bonus on wheat is separate altogether from the 35-cent initial payment on pooled wheat," declared Hon. ## NOTES AND COMMENTS

The best way to preserve the natural beauty of the forests, and to prevent the streams from being depleted of fish, is for the public to co-operate to the fullest extent. This is not being done by a large number of visitors to the forests. Fires are being left alive, fish under the regulation nine inches are being taken, and the limit per day is being exceeded. As long as there is no effective system of enforcing these regulations, they will be ignored, and eventually the attractions which the mountains now possess will be a thing of the past. Men who fished the streams 20 or 25 years ago freely admit there is nothing like the fishing to be had as in the early days.

"They Say" are two words used by people who carry rumors without first ascertaining if the rumors are true. People have been reported dead, to have quit their jobs, to have been thrown into jail, by the "They says" who delight to be first to spread a rumor, no matter whom it may concern. There is some gossip that may be really entertaining; but there is more that is of the opposite variety, and the more malicious the better the real old gossip-mongers enjoy it.

Possibly a newspaper man comes into contact with more rumors than the average person, for he must try and gather the odds and ends of news, and obtain the facts—not the rumors of the "They says." It is surprising how many people will perhaps have an inkling of some news, but when asked if they know it to be true, will tell you that someone told them, and so you go on indefinitely finding that someone told the first someone, until the originator of the rumor is lost in a maze of many someones, or it is discovered that there is no foundation of fact to support the rumor.

Occasionally rumors have serious results, which serves to impress on people the advisability to question any rumor which deals with the doings of others.

The law of compensation is ever at work. Just now when there is very little employment in the mines, however much we all would like to see more activity, we can at least pack up our troubles in the old kit bag or fishing basket and go out in the big hills and wade the streams in search of the nimble and wily trout.

The salesman who keeps plugging along making persistent effort to maintain sales in these days requires plenty of determination to fight down sales resistance which a period of depression causes. And he deserves greater credit if he makes sales. All lines of business require a measure of salesmanship, some more than others, but no business will prosper unless the art of salesmanship is employed.

"A Christian Solution to the Present Depression," and "How to Bring Back Prosperity," two articles by A. J. Nesbitt, of the well-known financial firm of Nesbitt, Thomson & Co., have been given considerable publicity. Mr. Nesbitt may be very sincere, but the articles savor much of the attitude of the man who finding himself in great difficulty, turned to God to help him out of the hole. So much buncombe is circulated under the guise of religious thought that people might be easily excused for taking such effusions as this with a grain of salt. One can picture Mr. Nesbitt giving up the business of floating bond issues, giving all that he hath to the poor, and heeding the words of Jesus Christ, who said to the rich man who asked how he might enter the kingdom of heaven—"Follow Me!"

Mr. Nesbitt says: "If we really want prosperity let us follow God's provision for bringing it about; but we must be in earnest and sincere." Fine sounding words, with which many will agree. On the other hand, "faith without works is dead." Many people have lived the true Christian life from childhood, and have enjoyed very little of the material benefits of the world, whilst the wicked have flourished like the green bay tree.

In eleven days the school bells will be ringing, and boys and girls will be getting up earlier in the morning.

## Personal and Local

Miss Winnifred Dunlop returned on Tuesday from Lethbridge.

Sam Moore went to Calgary on business on Monday.

Col. R. F. Barnes was holidaying at Waterton Lakes last week.

Mrs. Ferguson was in hospital for a few days during the week.

Harry Wilton Clark has returned to Chicago after spending three weeks visiting his parents.

Mr. and Mrs. Geo. Derbyshire and family are spending two weeks vacation at Nelson, B. C.

Helen Steffler of Moose Jaw is spending two weeks visiting her old school chum, Audrey Halliwell.

Mr. and Mrs. H. V. Hummel left last week for a vacation at Penticton, B. C.

Mr. and Mrs. J. A. McDonald have been spending a couple of weeks on a trip to Idaho.

Joan Siat and Virginia Janostak are at present visiting Mr. and Mrs. J. Wood at New Denver, B. C.

Rev. and Mrs. A. S. Partington and children are spending a holiday at Waterton Lakes.

Mrs. W. G. Fraser of Sixth street returned this week from two weeks holiday at Kellogg, Idaho.

Miss Gladys Lees was home from Lethbridge spending part of her vacation.

Mr. and Mrs. J. Emmerson returned last Thursday from a vacation in Vancouver and Victoria.

Miss Emma Antle returned last week from Red Deer where she spent a few weeks vacation with relatives.

Fred Antrobus and P. Chardon returned on Monday from a motor trip to Spokane, passing through a great deal of burned-over country.

On Thursday of last week Mrs. Lonsbury entertained a number of ladies in honor of Mrs. J. Scott, when a presentation was made.

Mrs. Kilgannon returned last Thursday from several months visit with her daughter in Los Angeles and other points in California.

Mr. and Mrs. I. James, Irene and John motored to Raymond last week. They were accompanied by Miss Muriel Jackson.

The bake sale and tea under the auspices of the R. C. Ladies Aid netted \$24.05. The aid wishes to thank those who gave so generously.

Miss Ethel and Miss Margaret Dunlop returned this week from Edmonton, where they had been attending a course at the summer school of Alberta university.

Mr. and Mrs. H. V. Peet spent two weeks holidays at Lloydminster. Mrs. W. H. Cook, sister of Mrs. Peet, and two little girls, returned with them to spend two weeks holidays here.

# The Prince Of Wales Greets Delegates To The Congress Of Universities Of The Empire

The Prince of Wales' greeting to the delegates to the Congress of Universities of the Empire in the Guildhall, London, England, recently was a Royal welcome in more than one sense and it was received with evidence of hearty approval. His Royal Highness began his address as president of the congress (which held its business meetings in Edinburgh, Scotland, a few days later) by reading a message which he had sent the King and His Majesty's reply thereto, the one loyalty and devotion and the other expressing pleasure and welcoming the delegates, especially those from overseas.

The Prince recalled the fact that the eight universities of a century ago had become 53 by the time the first congress met, and the delegates now assembled or assembling came from 70 different universities. Nearly 900 of them had crossed the seas to attend the congress.

The core of the Prince's subject was the need of educated men today, not only to fill high official posts everywhere in the British Empire, but to serve our commerce and industry—vital needs at home and abroad. In a special message, he came to the overseas visitors he spoke of the "other and better ties," among them the universities, which he liked to think, were displacing those more material links now fast disappearing, which had bound the empire together in the past.

"With the growth of our population, our commerce, and our national wealth has grown the need for advanced education, until nearly every great city possesses its university," His Royal Highness said. "At the same time, the duties and responsibilities of universities have increased in equal measure. The need of men today is greater than ever. Year by year, as the scope of our activities increases, men are called for in every part of the empire, not only to fill the higher offices, the services, and the government and municipal administrations, but to carry on the commerce and industry which are vital to our existence.

"I particularly welcome the presence of so many delegates from overseas, because the old concrete ties which joined our empire together in the past are fast disappearing, and I like to think that they are being replaced by other and better ties, which, though less formal, less tangible, in Burke's words, though light as air are as strong as links of iron. Among those links surely there can be none stronger or sounder than the universities of the empire. We have a common history and to a great extent community of race and language, of tradition and of interests. This congress adds the advantage of personal contact and enables us to meet together in social and intellectual intercourse, and to talk over the common problems which beset us all. In a word, it gives us an opportunity of co-operation which is quite as valuable an education as it is, to my mind, in most of the other phases of our lives. And it seems to me that you have it in your power not only to contribute to the solution of educational problems, but to strengthen the organization and to draw closer the finest ties of empire."

**Victory For The Snail**  
Word comes from London that the creature which its known the world over for its sluggishness—the snail—has won a victory over the world's fastest vehicle—the airplane. The British Royal Air Force field at Lake Habbaniya, near Bagdad, recently became overrun with countless snails. After all other means had been tried to get rid of the creatures, the Royal Air Force had to pack up, bag and baggage, including flying machines and all equipment, and move to another base.

"They snore so comfortably together that I am beginning to think there must be something in love after all."—Simplicissimus, Munich.

W. N. U. 1902

## Experts Will Attend World's Grain Show

Prominent Agro-scientists From British Acre Coming To Conference

Two of Great Britain's most noted agricultural scientists, Sir Alfred Humphries and Sir Roland H. Biffen, are to attend the World's Grain Exhibition and Conference to be held in Regina next year. Efforts to assure the attendance of prominent agro-scientists are meeting with pronounced success, according to Dr. J. H. Gladstone, Canada's Deputy Minister of Agriculture.

Sir Alfred is president of the research body of the National Association of British and Irish Millers. At the Regina meet, his attention will be directed particularly to the milling and baking section. A few years ago he gained world-wide recognition by his experiments in conditioning flour.

Head of the School of Agriculture, Cambridge University, Sir Roland was associated for a number of years with Sir Alfred in a series of researches designed to ascertain the nature of strength in flour and wheat. As results, scientists have what is known as the Humphries-Biffen definition of strength, the two-factor nature of strength in flour.

**THIS SPORTIVE JACKET DRESS—SO YOUNG THIS SEASON**  
An exceptionally attractive model is this with freshness and charm, so beloved by youth.

The dress was developed in pale blue crepe silk with royal blue dots. There were narrow bindings at the neck and armholes. The jacket reversed the colour scheme to carry out snappy contrast in royal blue with pale dots. The lighter tone crepe appeared again as trim on the jacket. And it's so easily copied. And at a surprisingly small cost.

Style No. 314 is designed for sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust.  
Pastel flat washable crepe silk, shantung in plain or puffed, linen, cotton mesh, wool jersey and shirting fabrics also suitable.  
Size 36 requires 3 1/2 yards 39-inch with 2 1/2 yards 38-inch contrasting.  
Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## Alfalfa Hay Most Valuable In Canada

Proper Handling Is Necessary For This Important Forage Crop

Alfalfa hay when properly put up is perhaps the most valuable hay in Canada. Yields as high as 4 1/2 tons per acre have been secured at the Dominion Experimental Station, Windermere, B.C. A good crop, however, can easily be spoiled by improper handling at harvest time. Unlike some other hays, alfalfa does not give a farmer much leeway in the time of cutting. This should be done when the plants are from about ten to thirty per cent. in bloom. At this time many small shoots will be found at the base of the plants. These shoots will make the second crop. If the time of cutting is delayed these small shoots will be cut off.

When the weather is bright it is easy to put up good alfalfa hay. Since the leaves contain a large part of the nutritive value, it is absolutely necessary that as few as possible of them be lost in the haymaking operations. When the upper layer of the swath has been wilted it should be put in windrows. A side delivery rake will do the work well in a heavy crop. If necessary, the windrow should be turned, and this operation can also be done with a side delivery. Where the crop is light an ordinary horse rake is preferable. If the crop is to be put in coils this operation should be done while there is still a certain amount of moisture in the stems, the size of the coils depending on the amount of moisture present. Alfalfa should not be left in the field any longer than necessary.

## What Makes A Farm

Track Of Land One Acre Or Over That Produces Crop To Value Of \$50 Or More Is A Farm

A lot of people in Canada are farmers and don't know it, at least if we take the official definition of the Federal Government as to what constitutes a farm for purposes of the census. A farm is defined as a tract of land of one acre or over which produced, in 1930, crops of any kind to the value of \$50 or more, or which is in crop or being used for pasture during the present year. Just how many farmers there are in Canada on this basis remains to be seen, but they will probably number close to one million. Ten years ago the total was 711,090 and this figure does not include over 30,000 units of land less than one acre producing crops of some value. Department of Agriculture.

## Lamps Of The Ages

Museum At Munich, Germany, Has Most Interesting Collection

The German museum at Munich has added an interesting feature to its exhibits in the shape of a collection of street lamps. The collection starts with the first street light used in Paris, a pitch basket. The oil light is represented by an old rapeseed oil lamp. The third, a gas light with five flames, was used in London in 1814. The collection includes lights up to the most modern incandescent lamps.

Mistress: "I thought you said this room was clean. Do you ever sweep under the carpets?"  
New Maid: "Sure I do, ma'am. Everything."

The tiger will not eat an animal not killed by himself.

## SHY LITTLE GIRL AND THE KING

Patricia Osborne (aged two), a little patient in the King George Hospital, Ilford, England, which H.M. the King opened this month, photographed in her cot with her teddy bear. When King George visited the children's ward he took little Pat in his arms, to the astonishment and envy of the other children in the ward.

## Might Let Them Try

Question Is Would Women Rule Country Better Than Men

Somebody in Portland suggested the other day that, since men had made such a hash of running the country, it was about time to give the women a chance.

Somebody else replied that women had a majority of the votes already and, if they wanted to run the country, they could do it. He (yes, of course, he was a man) said that women were quite content with "their place in the home."

Then the war began. Letters to the editor, pro and con, filled the columns of the papers.

One woman said that if her sex were running the country they would, at least not let people starve. She was probably right. That's just the sort of thing a woman would think of first.

It's the sort of thing that Mary Ellen Smith, Margaret Bonfield, and their sister parliamentarians keep harping on, to the annoyance of their male men colleagues.

Should women rule? There have been some extraordinarily capable women monarchs, Elizabeth, Victoria, Catherine the Great and others. But they had male advisers. The women have never had a complete innings of their own.

Would Canada be a better country if the House of Commons had 244 Agnes MacPhails and only one Bachelor Bennett railing a feeble voice for his sex from the back benches? Would a city council, all women, make a better job of running Vancouver?—Vancouver Sun.

## Reach Remarkable Age

Triplets, 86 Years Old, Live On Three Continents

Exceeding the proverbial three score and ten by an additional 20 years, Charles Mayhew, the eldest by three-quarters of an hour of boy triplets, is shortly to celebrate his 90th birthday. Mayhew's two brothers live in Canada and Australia, thus making the veteran triplet combination an empire-grown product.

Charles Mayhew lives in the King's Cross district of London, England, and was formerly Charles Dickens' shoemaker. Mayhew says that in Dickens' "Our Mutual Friend" there is a picture of him at his work. The finish of the Russian war is named by Mayhew as the most glorious day of his life. St. Paul's was the place of celebration of the occasion; the whole shape of the cathedral was there in daylight. Mayhew sang at the funeral of the Duke of Wellington. As a boy he sang at St. Clement's.

Mayhew worked at his trade until he was 86. He eats, as he puts it himself, "anything that comes to hand." He has a standing challenge open to any man over 70 to walk to Cambridge, a distance of about fifty miles. Mayhew will use a pair of shoes made at his own bench. He expects to see his 110th birthday in good health.

## Honoured Commodore Perry

A group of Canadian and United States dignitaries steamed out in Lake Erie recently, to the spot where Commodore Oliver Hazard Perry defeated the British 118 years ago, and dedicated a memorial to both the victory and the peace which followed.

The banana plant, tall as it grows, is not a tree because there is no wood in the main stem.

# The March Of Grasshoppers Which Ravage The Countryside Is One Of Nature's Mysteries

J. V. McFar, in Mail and Empire: Not living in Nebraska which is being ravaged by a plague of grasshoppers which has already done millions of dollars worth of damage, one can view the thing as a phenomenon rather than as a calamity. The stories from Nebraska tell of trees, grass, clothing and even people being devoured by the myriads of insects as they pursue their unpredictable path for ends that remain wrapped in mystery. It is a common notion that grasshoppers swarm over a countryside in the season of food. This is no more true than it is true that the occasional migration of the lemming are occasioned by a sudden and uncontrollable desire to have a swim. The death of the lemming in the ocean is the destruction of the crops in the path of the grasshoppers seem to be mere incidents to a deeper mystery which perhaps is connected with the migration of birds which science has yet been unable to explain. Perhaps it is the same urge in the golden plover, the Arctic tern, the little rodent of Scandinavia and the grasshopper in Nebraska. One may be observed as a beautiful phenomenon, while the other may be a natural disaster comparable to an earthquake or the eruption of a volcano.

Some months ago there was an article on Asia by R. W. G. Hingston, the famous English explorer, who has observed grasshoppers in flight or on the march in different quarters of the world. Major Hingston says: "Their wanderings have no relation to food. They do not pick up the luxuriant places in food, scarcely heeding them beyond nibbling a little, and on to barrenness ones more. Indeed when actively on the march they will not stop even to nibble if they come upon some luscious patch." It is by day that the hoppers show activity. When night falls they halt and spend the hours of darkness either upon the plants they happen to have lit upon or under stones or clods. When it becomes light again they begin to stir, and soon are once more on the march. This observer has calculated that they advance a mile in about three hours. They travel steadily by creeping or jumping, all headed in the same direction.

If one regards the main body as an advancing lake of colour, he will find parallel to it several other lesser bodies like streams. These are made up of grasshoppers, too, moving in the same direction as the chief host. On the march they not only do not appear to be on the lookout for fresh pastures, but they indulge cannibalistic practices which are not observed at other times. If one of them is injured the others will immediately attack it, drawing from the body whatever juices it may contain. Major Hingston, struck with the fact that no matter how isolated from the mass some of the hoppers might become, they still maintained their sense of direction, caught a few and whirled them round in a tin box, thinking that they might be disoriented. But as soon as they were turned loose, they resumed their old course, as faithful as the needle to its pole.

These swarms have any connection with the metamorphosis which the insects undergo? The fact that they occur before the final moult is interesting. A locust moults five times, and it is only with the final moult that its wings are capable of bearing it through the air. Before they develop it remains a hopper. Then it advances a stage and its wings are suitable for carrying it forward, for short distances on the principle of a glider. Presently they become strong and it can soar in the air. Usually kept under observation, that the flying insects keep on increasing, so that a body which set forth composed exclusively of hoppers may reach its destination as a winged host. This is one of the most thrilling sights of nature. This immense army whose numbers must be reckoned in the thousands of millions literally fills the sky. Its progress is curious for while the insects seem to be headed in one direction they really advance at right angles to it. The depth of the swarms can only be guessed at but it may be two miles thick, and because of different air currents the various strata are often seen to advance at different rates of speed.

Sometimes the whole mass will be seen suddenly to change its direction as though upon a common impulse. Stragglers reaching the same spot hours afterwards will also turn as though a guide post had been left for them.

For centuries mankind has been trying to cope with the locust plague, and in recent years with the invasion of poison gases and flame throwers have met with more success than for thousands of years earlier. The time to attack the insects is before they have sprouted their wings. Trenches can be dug in their line of march, and the locusts destroyed as they tumble into them. Efforts to exterminate them by digging up the ground in which their eggs are laid have met with only partial success. Once they have finished their fifth moult and have taken to wing they are impossible to deal with, and the only hope is that they may take their way out to sea like the lemmings and return no more.

## Why Soils Wear Out

Only By Return Of Plant Foods Can Soil Fertility Be Maintained

In many parts of the country one hears a lot about worn-out farms. Soils do wear out by continual cropping, and here are some of the facts as supplied by Dr. F. T. Shutt, M.A., D.Sc., Dominion Chemist, Department of Agriculture. A 25 bushel crop of wheat removes from the soil about 30 pounds of nitrogen, 12 pounds of phosphoric acid, and 7 pounds of potash in a year. A 200 bushel crop of potatoes removes about 42 pounds of nitrogen, 18 pounds of phosphoric acid, and 40 pounds of potash. Taking an average of these two crops, the average crop removes 36 pounds of nitrogen, 15 pounds phosphoric acid, and 33 pounds of potash in a season. According to estimates of the total amount of plant food present in soils of good quality, the available supplies of these three basic food substances would, if not renewed by some means, be completely exhausted in 113 years for the nitrogen, 266 years for the phosphoric acid, and in 227 years for the potash. Only by the return of plant foods can soil be maintained.

## Dry Mash For Poultry

Although Higher In Cost It Increases Egg Production

The superiority of the dry mash as a feed for poultry over either a wet mash or a combined dry and wet mash is clearly shown in a test conducted during the past four years at the Cape Rouge Experimental Station of the Federal Department of Agriculture. The tests showed that while feed cost slightly more in the dry mash from flocks of similar size was so substantial that they resulted in a net saving in the cost of producing a dozen eggs of 18 cents.

The largest flock fed the dry mash numbered 88 birds, producing a total of 3,872 eggs, which sold for a total value of \$235.32; while the cost of the dry mash fed was \$71.04, making the average cost per dozen 22 cents.

With a flock of 81 birds fed a wet mash production totalled 2,420 eggs, having a selling value of \$137.68, while the feed cost \$67.92, making the cost of eggs per dozen 38 cents.

With a flock of 81 birds fed a wet mash production totalled 2,420 eggs, having a selling value of \$137.68, while the feed cost \$67.92, making the cost of eggs per dozen 38 cents.

## Have Been Warned

The ladies of a city who they weren't warned "Within 100 years," Dr. Paul F. Mahaffey, of Springfield, Ill., told the Scientific Association of Chiropractors, women will have feet like the hoofs of horses if they keep on wearing shoes with high heels.

In its efforts to obtain moisture, a Hawaiian swamp oak less than three feet high and a year old grew a rootlet seven feet long.

"My doctor says that sleeping out doors tends to make one beautiful."

"That explains the charming appearance of most tramp!"

"Waiter, we want chicken. The younger the better."  
"Then, hadn't you better order eggs, sir?"—Wahre Jakob, Berlin.

## CHAPTER XXVI.—Continued

It was there that Simeon found her, coming in from the garden at a frantic summons from the maid, who had heard Gay's cry. The old man perceived the yellow envelope on the floor, and thought: "God help us! she has had bad news."

Then he saw that it was unopened, and hastily tore it with quivering trembling hands. What he read caused him to gasp. He had heard Gay's cry, the old man perceived the yellow envelope on the floor, and thought: "God help us! she has had bad news."

Then he saw that it was unopened, and hastily tore it with quivering trembling hands. What he read caused him to gasp. He had heard Gay's cry, the old man perceived the yellow envelope on the floor, and thought: "God help us! she has had bad news."

water, idly wondering if its shade of blue would be becoming for a new evening gown. After a few moments the Colonel joined her. Deep in her plans for a new gown, Angela smiled absently, and thus encouraged her began one of his reminiscences.

This reminds me of the last cruise I ever took," he said absently. "Started from Bar Harbor—"

Angela stirred uneasily, wishing that Colonel Nowell had never heard of the estate of Malibu. Probably his cruise would end at Painter's Neck. He was forever going to Painter's Neck—by steam, by automobile, or by water. It was with relief that he saw Nick and her husband coming toward them. She interrupted the Colonel's narrative to greet them with unusual graciousness; but Colonel Nowell once started, was not to be side-tracked.

"Just telling your wife about the first cruise I ever took," he resumed tirelessly. "You familiar with Maine, Halliday? Great state. Finest coast in the world. Ever heard of a place called Painter's Neck?"

It seemed to Nick that for a perceptible moment Halliday hesitated; then, moving nearer to Angela, he said quietly: "Yes, I know the place." "Really?" The Colonel appeared a bit surprised. "Went there before your marriage, I suppose."

Angela cast a frightened glance at her husband; but he said casually: "No. We had a house there one summer. This is a wonderful day to be in the water, isn't it? But after all, I think I prefer the mountains. Ever been to the White Mountains, Colonel?"

"Why—er—yes," came feebly from the Colonel. For once he seemed to grope for words. His eyes sought Nick's inquiringly, but did not meet them because Nick was intent on Angela's hands, clutching the rail so rigidly that the veins stood out in harsh, unlovely lines. Then Halliday moved closer, laying one of his hands on hers, protectively.

"Let's sit down," he suggested, and seating his wife courteously, took the chair beside her.

The Colonel tried once more to meet Nick's gaze, and failing, said with a return of his old, jaunty manner: "Well, guess I'd go round the other side and get a nap. This air makes me sleepy. See you later, folks."

(To Be Continued.)

## The Woman Motorist

Practices Making Her As Perfect Driver As A Man

The proof of the pudding is in the eating. The old gibes against the woman motorist are dying before our eyes for the mere reason that the number of women drivers is increasing at so astonishing a rate. There is not much more sense in saying that women are congenitally incapable of driving a motor car than in arguing that men are debarrated by their sex from learning to knit or sew if they wish to do so. It is a matter of practice making perfect in both cases. And in the case of the vast majority of women motorists, it is in making as nearly perfect as the average male driver at any rate.

## Taking Long Trip

Queer Conveyance On Its Way From Saskatchewan To Montreal

Half-auto and half-wagon, with a half-bred at the helm, a weird creature is on its way "From Valmarie to Montreal or Bust." Two prancing grey horses draw the converted chassis which Alfred Choquette is driving from his farm at Valmarie in Southern Saskatchewan.

Choquette, who formerly farmed in the Maripolis area of Manitoba, left his Saskatchewan land after four years of crop failure. He carries as companions on his trip a gopher and a pair of badgers.

Water in the open Atlantic Ocean contains roughly 3.5 per cent. of salt, but in the Siberian Ocean the percentage runs as low as 1.3 and in the Suez Canal as high as 5.1.

Aching  
CORN  
STOP HURTING  
INSTANT  
RELIEF!

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. Relief is almost instantaneous. Removing corns with "Putnam's" is so easy, so sure, so painless—thousands use this wonderful remedy, and it is the best. Don't suffer any longer, use Putnam's Corn Extractor, the one sure relief for corns. Sold at every drug store.

Putnam's

## Instructor For Lindbergh

Gatty Taught Navigation To Famous Flyer and His Wife

Harold Gatty, navigator of the "Winnie Mae" has "about the sun" since he was 17 years of age. At that time he was employed as a navigator on a merchant marine vessel, after having studied for four years at the Royal Australian Naval College.

Gatty remained in the merchant marine service until 1927 when he came to the United States. He became associated with Lieutenant-Commander Phillip Van H. Weems, U.S.N., recognized as one of the world's greatest authorities on navigation, and did research work under his direction. Later, when Lieutenant-Commander Weems went to Annapolis to teach graduate students, Gatty established a training school near the Grand Central Airport where he taught a modification of Lieutenant-Commander Weems's system of celestial navigation.

While there he had many famous pupils, perhaps the most conspicuous of whom are Col. Charles A. Lindbergh and Mrs. Lindbergh.

Gatty's system of navigation is said to be so practical and precise that he can fix the location of his ship in less than a minute after he has observed the sun or a familiar star. To accommodate these observations, a special optical device made in the cabin of the "Winnie Mae."

## Keeping the Sea Clean

Britain Considering Bill To Prevent Oil Discharges From Ships

The House of Commons gave first reading to a bill, introduced by Sir Cooper Dawson, Cons. Brighton, designed to keep the seas clean. The bill would require oil-carrying ships to free their liquid discharge from oil.

Sir Cooper estimates that 2,000,000 tons of crude oil were discharged from oil ships into the sea every day. This oil drifted to coasts, damaging fisheries and despoiling sea resorts.

"If Britannia cannot rule the waves, that's no reason why we shouldn't keep them clean," he said, as members cheered the bill on its way.

THE RHYMING  
OPTIMIST

By Aline Michaelis

## THE SEEKER

He is a seeker, let him go Still seeking what he does not know, A prey to hunger and despair, As up and down the world he fares He keeps burning in his breast That will not give him peace or rest.

He is a seeker and he finds In every path that turns and winds A hint, a glimmering, a trace Of that which makes life dear and true, Of that which makes life dear and true.

The joy supreme, the joy unknown, He is a seeker . . . unpossessed Always the object of his quest; His goal ungrasped, his dream denied, Yet joy goes ever by his side.

For only one who seeks the light Of some white star across the night, Some glow from other realms than this Can know the utmost heights of bliss.

Douglas' Egyptian Liniment is remarkable in its quick, effective action. Relieves instantly burns, sprains, toothache and neuritis. Invaluable for sore throat, croup and quinsy.

## Canada Secures Space

Government Will Exhibit Next Year At British Industries Fair

It is announced by the Department of Trade and Commerce at Ottawa, that reservation of a Canadian section at the Birmingham section of the British Industries Fair next year has been made by the Canadian Exhibition Commission. The same space as was held this year has been secured and is located in the heart of the show.

Considerable attention has been attracted in past years to the Canadian Government exhibit, which is the only one of its kind from the overseas Dominions and Colonies.

## Smarter Than Teacher

The teacher wanted to know why Jim had absented himself from school for a whole week.

"But he's past his fourteenth year, ain't he?" said Jim's mother, "and me and his father think he's had schoolin' enough."

"Nonsense," said the teacher. "I didn't finish my education till I was eighteen."

"Oh," said Jim's mother, "but Jim's got brains."

A new farm machine does several jobs at once, combining the work of the spring harrow, the roller and the grain drill.

**ENO'S FRUIT SALT**

**The Safest, Surest Way To Health**

The daily dash of ENO in a glass of water every morning is the safest, surest way to inner cleanliness. And to be inwardly clean is to be healthy.

ENO'S "Fruit Salt" is a delicious health beverage that tones and sweetens the entire system. For constipation, acid stomach, fatigue and biliousness it is without equal.

But remember, only ENO can give ENO results.

## Disseminating Knowledge

Free Lectures On Health Subjects Given By Canadian Social Hygiene Council

The Canadian Social Hygiene Council's Free Radio College of Health has just concluded its third annual term. It is the only college of the ether—unique also because it has no bureau, buildings nor books, no fees, degrees or examinations and only one subject—health.

This term, thousands of Canadians on farms, and in villages, towns and cities from coast to coast have heard the voices of lecturers telling them how to prevent diphtheria, typhoid fever, how to beware the early signs of cancer and how to seek health through nature's greatest medicine—sunlight.

Thirty lectures in all have been given and the entire course has been as free as the ether that carried its message. Sixteen radio stations and scores of daily and weekly newspapers have given free time and free space to the lectures and these were provided free by the Canadian Social Hygiene Council. The result has been a "college" with an unprecedented low running-cost, its only endowment good-will, its lecture-halls the homes of the Canadian public.

The response of this vast, invisible class is attested by letters from every corner of Canada. Lectures were delivered in French and English.

The importance of pure milk, the saving of child life through proper care and feeding, mental hygiene, prevention and cure of tuberculosis, the need for regular physical examinations, these and other subjects close to the life of the average Canadian, were dealt with.

## Estimate Was Close

Gatty's Plans For World Flight Accurately Carried Out

Four months ago a blue-eyed young chap wandered into a Los Angeles newspaper office. It was Harold Gatty.

"Why Post and I," he explained, "you know, the winner of last year's nonstop air race to Chicago, are going to fly around the world in 10 days, maybe seven. Would that make a story?"

It would. It did. Not only Post and Gatty go ahead methodically with their preparations; they adhered to the plans with surprising rigidity. Gatty, for instance, said plans showed 107 hours of flying time would be required. The flight took them just 106h. 5m. They figured the ship would make 150 miles an hour. It did, on an average.

At the first symptoms of sore throat, which presages ulceration and inflammation, take a spoonful of Dr. Thomas' Electric Oil. Add a little sugar to it to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who were periodically subject to quinsy have thus made themselves immune to attack.

Housewife—I haven't what to eat in the house, but would you like some cake?

Tramp—Yes. Housewife—Yes what? Tramp—Yes, dear.

Brasil is trying to stop public-lantrains.

Could Not Check the Summer Complaint

A Few Doses Did It

Mrs. B. Coulter, 918 11th Ave. E., Calgary, Alta., writes: "Last summer my youngest son was very bad with summer complaint, and everything he ate would vomit, and he got so this I became very much worried. I could not get the discharges checked, so I went to the drugist and he gave me a bottle of Dr. Fowler's Extract of Wild Strawberry and told me it would stop the trouble if anything would. After I had given the boy the first few doses I noticed the discharges were being checked, and it was not long before he was well again."

Dr. Fowler's Extract of Wild Strawberry

## Little Helps For This Week

"If I love one another, God dwelleth in us, and His love is perfected in us."—1 John iv. 12.

"More blessed 'tis to give than to receive." No more—no mystic dogma to believe. Only a thread in each day's life to weave;

Only a common duty, in such wise Transfigured by Holy Light, that straight my eyes Saw how above all truth true loving lies.

Saw that, forgetful of my own soul's need, Filling my life with gracious thought I might leave time—and God—to shape by creed.

—Little's Living Age—

They ask me for secrets of salvation. For myself I know no secrets but this,—to love God with all our hearts and our neighbor as ourselves.—Saint Francis de Sales.

## Relics Of The Great

High Price Paid For Lock Of Nelson's Hair

A lock of Nelson's hair to be sold by auction in London is likely to provoke a fair amount of bidding, for all such relics those of the great admiral command the highest price.

A wisp of his hair sold some years ago realized no less than \$1575, or \$300 more than the highest price paid for a similar memento of Napoleon, and higher than the highest bid on record for a sample of Wellington's grizzled locks.

The vagaries of the hair relic market are curious. One of Byron's curls sold not long since for \$85, which would have been a godsend to the owner in his lifetime, but clippings of Sir Walter Scott's fine thick hair never risen above \$40 in the open market.—Evening Times, Glasgow, Scotland.

## Signal For Level Crossings

New Device Battles When Car passes Over It

A level crossing signal device that fools motorists into thinking they have lost a couple of fenders and perhaps an axle has been tried out on highway 21 near Ridgeway, Ontario last week.

The device consists of a series of steel bars laid over a sound box in the roadway. A car drives over the box and the bars rattle. The motorist, at that point, if he doesn't stop, knows that he has run over a crossing signal and looks for trains.

Must Keep Pets Quiet

The city health officer at Poughkeepsie, N.Y., has issued orders to the owners, respectively, of a rooster, a parrot, and a flock of cooing pigeons to muffle the birds or get rid of them. Residents of the city have complained about the noise of the birds.

Sweet and palatable. Mother Graves' Worm Exterminator is acceptable to children, and it does its work surely and promptly.

The railroad brotherhood have refused to join with the bus drivers. About the only place they seem to get together is at the crossing.

**BORDEN'S CHOCOLATE MALTED MILK IS GOOD AT ANY TIME**

## Local News

Idris Hayson, Miss Edith Hayson and Sonny Richards returned this week from a motor trip to Spokane and points in Idaho.

Mr. Dibble, formerly of Coleman Garage, is now employed with West Kootenay Power & Light Co. at South Sloca.

Those intending to write supplementary examinations should communicate with Principal Hoyle, at once.

Mr. and Mrs. James Ford returned on Sunday from a two weeks motor tour to Spokane and British Columbia points. Their son William accompanied them.

Mrs. Herdman McLeod, Mrs. Russell Ferguson and Joy, and Miss Marge Bell, motored to Lethbridge on Monday by Barrington's Taxi.

Mr. and Mrs. Plante and family recently spent a few days with relatives at Gleichen, and their daughter Verda is remaining there for a few months stay.

Marjorie McLeod left last week for Holy Cross hospital, Calgary, to commence training, her mother accompanying her, from whence she went on to Winnipeg.

Mr. and Mrs. J. Stevenson of Salt Lake City motored to Coleman to spend two weeks holidays with Mr. Stevenson's parents, Sixth street.

Rev Fred Antrobus, B. A., of Peace River, is expected home on his vacation on Friday. His younger brother William will return with him, after spending summer holidays in the north.

Mrs. Brownie Pollack and daughter Adelaide left for their home in Trail, B.C. on Monday, after spending a few weeks vacation with Mrs. Pollack's parents, Mr. and Mrs. Joe Kwasney, of West Coleman.

Mrs. Alex. Dunlop and two young sons, of Powell River, B.C., are visiting Mrs. Dunlop's parents, Mr. and Mrs. Wm. Antrobus. Mrs. Wm. Dewar of New Jersey is also visiting at her parents home.

Miss Margaret Halliwell, R. N., has gone to Medicine Hat for three weeks to take charge of the baby clinic conducted by the provincial health department, relieving during the vacation of Miss Hagerman, nurse in charge.

The third competition of the season, held by the Rod and Gun Club, will take place at North Fork on Sunday. Cars will leave at 6.30 a. m., and names and fee must be handed to A. Phillips, sr. at the latest by Friday evening.

Mrs. T. Holstead and daughter returned on Sunday evening after spending six weeks with her parents Mr. and Mrs. T. M. Brown, of Spring Point. Misses Helen and Pearl Fisher returned with them and will spend a few days vacation here.

Mr. Kafoury, dry goods merchant, of Blairmore, failed to make the first turn on the grade of the highway east of McGillivray offices, near Cameron school, his car landing in the ditch and causing severe injuries. He has since been in Coleman hospital suffering from a badly fractured arm.

Malcolm Morrison of Drumheller was a visitor here during the week visiting his brother Dan and renewing acquaintances with a number of old friends. Mr. and Mrs. Morrison moved from Coleman to Drumheller several years ago. Dan Morrison accompanied him back to Drumheller for a holiday.

Sidney White, B. A., has been appointed to teach Grade XII in Blairmore high school. He is a former Coleman boy, his initial experience in teaching being here, later taking his degree at Alberta university. His appointment was unanimous from a list of 25 applications, states the Blairmore Enterprise.

Delbert Fleming left here recently to work at Olds.

Coleman Garage Ltd. is putting on a sales campaign for the new General Electric set which has recently been placed on the market, and which sells at \$89.50. F. B. Van Duzee, formerly of the Bank of Commerce staff in Coleman, is engaged by Coleman Garage radio department.

Mr. Melville Anderson, of Anderson & McLean, eight specialists, of Calgary, announces next visit to G. R. Powell's, Coleman, Tuesday, Sept. 1st. 20 years experience and regular visits assure you of satisfaction in all optical work.

**\$125.00**

## Watch Chains Given Away Free

with a high-class serviceable Watch, which will last for years. The watch is \$1.75, Chain Free.

**PATTINSON'S HARDWARE STORE**  
Store Phone 180 House Phone 30F.

## School Shoes for Boys and Girls

**Value!** The test of value is not in first cost, but in the length of wear. Your boys and girls may wear out three or four pairs of cheap shoes to one pair of good quality, thus costing you twice or three times as much as one good pair of shoes which are made for comfort and long wearing. Buy from an exclusive shoe shop to ensure the best value.

We invite comparison of prices—you'll find our values are the best—bar none.
